

# WeeklyReport\_2018-12-24\_12-30\_E

---

## Week Overview

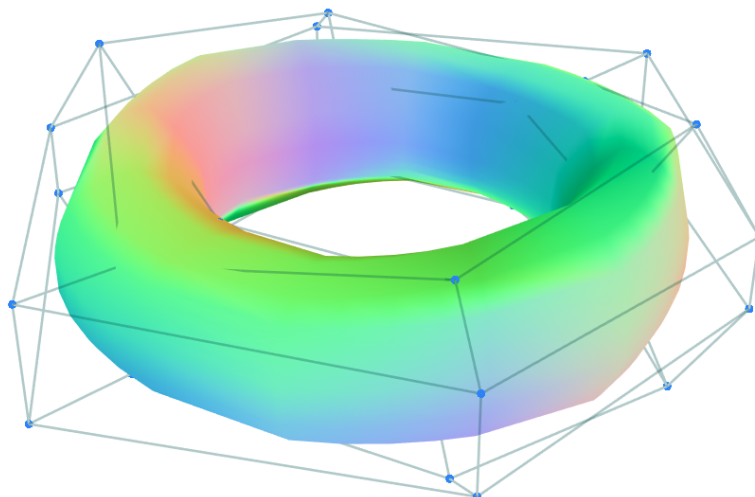

- next month will be very hard for me (preparing for the final work)
- workTime:  $3 + 7 + 7 + 5 + 5 + 8 + 8 = 43$  hours

## Project: RSATree

- Processed xian's data set (1billion rows) in order to prove the dynamic divide of our algorithm. I spent two days completing the backend data processing
- The splom data set performance test was completed according to the new standard. Our data set memory ratio is still larger compared with nanocube
- next week I will still help Mei for the last things

## Geography modeling Course

- I complete the homework of GM, including code and report
- this Sunday teacher Feng said my report is incompatible with our command and pointed out some problems on the code
- next week I will modify the code and report

## Daily affairs

- almostly complete the ppt in VR class
- attend contest in codeforces and nowcode

- next week the main work is GM and CG(z-buffer) homework

---

### Short-term perspective

Work	deadline	Tip
Complete the ppt of VR	Mon	
modify the final work of GM	Sat	
complete the assignment 3 in ML	Sun	
complete the final work CG z-buffer	Sun	

### Long-term perspective

Work	deadline	Tip or Progress
complete homework of GM, CG	19.01.14	
RSATree Project	may be January?	
Dimensionality Reduction	None...	more test
GraphLayout	None...	understand the visualization part
